

DIGITAL DOOR SIGNAGE

The eSign displays complement the easescree eSign server software with a dedicated hardware solution to ensure optimized room administration, efficient utilization, time and cost savings for all companies along with increased quality for visitors and participants.

HARDWARE

- Colour display in 7 and 10 inches with touch functionality
- Colour display in 15 inches without touch functionality
- Suitable for surface and flush mounting (depth of the wall mounting housing around 40 mm)
- RAL colour of choice
- Power supply via POE

SOFTWARE

The web-based booking interface provided by the eSign server has connectors to Microsoft Exchange Server, Google Calendar and all other resource and facility management systems that allow data exchange via .csv, .xml, etc.
