

DVI Optical Extender **DSK**

Thank you for purchasing DSK

*Optical DVI extender DSK extends DVI signal up to 1000M using a single strand s of multi-mode optic fiber.
It supports single-link DVI resolutions up to 1920x1200.*

Check your package

Check the package and make sure you have everything:

Contents

- (1) DSK Transmitter & Receiver
- (2) +5V DC Power supply x 1pc
- (3) User's Guide

If any of these items are missing in your package, contact OPHIT or your supplier for support.

NOTE: Package content may differ if you have placed a special order or placed order from anywhere other than OPHIT CO., LTD. OPHIT CO., LTD. reserves the right to make changes without further notice to a product described herein to improve reliability, design, packaging or function.

Installation

Installation Steps:

1. Connect the Transmitter module to the DVI source device.
2. Connect the Receiver module to the display.
3. Connect a single strands of multi-mode SC terminated fiber optic cable(50/125 μ m) from the Transmitter to the Receiver module.
4. Connect the included +5V DC power supply into Receiver module.
5. Green LED indicator on the modules will be light up after all connections are completed.

NOTE: The Transmitter module does not need to be externally powered unless the source device does not supply enough power through the DVI connector.

Self EDID Detecting Procedure

Self EDID Detecting

1. Power on your display.
2. Connect Transmitter module to the DVI port of display
3. Plug DC 5V power into the Transmitter.
4. LED indicator will begin to blink rapidly. After a few seconds, LED will stop blinking. EDID is being read from the display and stored by the Transmitter module.
5. Disconnect the Transmitter module from the display.
6. Restart system according to the installation steps in previous page.
