i3-TECHNOLOGIES

Discover a new way to present with a device that is both compact and light. The new i3SYNC Touch is userfriendly and enables participants to share content on a central screen at the push of a button. The tool is compatible with all technology devices that have a HDMI connection. You only need to plug in the wireless transmitter and receiver and you are ready for instant sharing.

WARRANTY

Top features

Multiple transmitters
Quickly and easily switch between different presentations at the touch of a button.

Preview function on i3SYNC Touch home screen.

Secure connection
Establish a secure connection between receiver and transmitter.
