HTMI HTML5 Client WI Webinterface-ready

1 If the control is supported by the respective output device (e.g. RS232) and the output device is implemented in eas@screen.
 2 HTML5 Native Apps with Offline Storage available for following devices please visit eas@screen Knowledge Base: [HTML5 Client Supported Manufacturers and Platforms](https://downloads.eas@screen.com/Documentation/eas@screen_HTML5_EN.pdf)
 For supported firmware see: https://downloads.eas@screen.com/Documentation/eas@screen_HTML5_EN.pdf
 3 May require additional modules/features.

4 Installation of appropriate codecs for Microsoft Windows required or for HTML5 Client those formats that are supported in the HTML5 framework/device.
 5 Use of dataimport (sensors) and HDMI In/Analog/Digital TV (free-to-air) requires hardware compatible with eas@screen.
 6 HTML5 currently only supports sensors, no XML/CSV
 7 Includes Adobe Flash & Apple Quicktime if available on platform.
 8 The eas@screen eSign Feature can be used in conjunction with the eSign Server and allows you to display room booking information.
